Countertop Systems

Food Safe. Long Lasting. Antimicrobial.

Countertop Systems

Food Safe

Non-toxic and food-safe. The FDA approved coating system is designed for direct food contact and exceeds all requirements. Commercial, family, kid, and pet safe.

Heat Resistant

Counters that are resistant to heat that allow you to set a hot dish on the surface without instantly ruining your countertop.

1/2 the Install Time. 1/2 the Cost.

Unlimited Designs & Color

When it comes to design possibilities iCoat Countertop materials are the most versatile material. Any color or pattern you can dream can be created.

Antimicrobial Surface

Stop or kill microorganisms. Avoid bacteria, mold and mildew on surfaces that could otherwise live for days. iCoat nonporous countertops are hard, stain and scratch resistant, and antimicrobial.

Countertop Systems

Food Safe. Long Lasting. Antimicrobial.

Reduce Tear Out Costs

iCoat Countertops cover a variety of material without the need to remove existing material including:

- Formica
- Laminate
- Ceramic
- Metal
- Tiles
- Wood
- Concrete and more...

Match Your Brand

For your business, bar, restaurant, or office, match the identity of your brand to the exact identity color and logo of the brand.

Seamless Surface

The only type of countertop that offers a seamless continuous surface for continuous color and pattern for any size.

High-Gloss Finish

If you are looking for a super-shiny and glossy polished finish you'll love iCoat Countertops. You can't get glossier.

30-70% Less Cost than Granite, Marble and other Surfaces

Refinishing countertops is significantly less expensive than installing new counters, and less disruptive to your living space.

Easy to Clean

Use almost ANY cleaning product without damaging the surface, ensuring you have a safe place to prepare foods. The nonporous surface is also resistant to mold and bacteria growth.

Applications

- Kitchens
- Bathrooms
- Commercial
- Bars
- Restaurants
- Offices and more..
